

Trailer Manufacturing System

A Companion Product for AddonSoftware

MR Software Solutions

Trailer Manufacturing System by Barista

MR Software Solutions' Trailer Manufacturing module is a companion product to the AddonSoftware Enterprise Resource Planning (ERP) system. Combined with Addon's Accounting and Distribution Bundles, it provides an excellent solution for manufacturers requiring a system capable of generating quotes/work orders using predefined Bill of Materials (Trailer Master, Trailer Assembly, Trailer Options) and Templates for Cutting Steel.

Processing consists of creating and tracking the three types of work orders and using Shipment Management to complete getting the finished goods to the customer. Each of these tasks interface along the way with the AddonSoftware Modules to create customer quotes, as well as required shipping documents and customer invoices, all the while keeping your inventory availability up to date.

Seq	Work Ord No	Status	Trailer ID	Description	VIN
001	030365	Completed	TUS-05-08	TRAILER STD UTILITY 5 R X 8 R	XXXUP98120R030365
002	030366	Completed	TUS-05-08	TRAILER STD UTILITY 6 R X 8 R	XXXUP98140R030366
003	030367	Completed	TUS-05-08	TRAILER STD UTILITY 5 R X 8 R	XXXUP98160R030367
004	030368	Completed	TUS-05-08	TRAILER STD UTILITY 5 R X 8 R	XXXUP98180R030368
005	030369	Completed	TUS-05-08	TRAILER STD UTILITY 5 R X 8 R	XXXUP98100R030369

Trailer Manufacturing System Features

Trailer work orders can be generated from sales orders or entered individually.

Trailer work orders are retained after completion for historical uses. Quickly create new orders from an existing one.

Trailer Master form features appear in four tabs, Trailer Information, VIN Information, Trailer Detail and Standard Options.

Print MSOs, VIN Tags, Tire Tags, Shipping Documents directly from Shipment Management.

Reports include:

Work Order Report...
Select and print work orders based on order number range and/or worker status.

Assembly Orders Report...
Shows status for a range of assembly build orders.

Cut Steel Orders Report...
Shows status for a range of cut steel orders.

Shipments Status Report...
Shows status for all or a range of shipments.

Trailer Report...
List of trailers pulled from the Trailer Master

The Preview Button, on all the work order entry forms, will generate a "traveler" for the respective order. These can then be output or emailed using Barista Document Processing.

Another great feature of the Trailer Manufacturing system is the **Initiate Invoice** button on the Shipment Management form. Once all the shipment tasks are completed you can use it to generate Invoicing data in the Addon Order Processing module.

Like all the Addon Modules the Trailer Manufacturing Module has **context sensitive help**.
